

## Easy Vape Instructions

### Easy Vape Vaporizer Owner's Manual

- 1.) Insert fuse (2amp) into the back of the Easy Vape vaporizer unit, the fuse is needed for the **Easy Vape** to function.
- 2.) Turn on the **Easy Vape vaporizer** unit and increase the temperature to its highest setting.
- 3.) Let the unit run at this level for 15 minutes. As this will burn off the manufactures packing oils on the **metal heating element**. *(Make sure you do this in a well ventilated area.)*

### Getting Ready to Use the Easy Vape Vaporizer

- 1.) Turn on the **vaporizer** unit by pushing in the knob on the front of the unit and increase the temperature to 320 - 350 degrees by turning the knob clockwise and adjusting the temperature. (Check the heating element for a dim red glow. If the heating element is bright orange turn off for 10 seconds and reset)
- 2.) Grind up **aromatherapy** and suck up into the tip of the **glass wand piece**. Recommended load is 1/3 or less of the bowl volume (from screen to tip) lightly packed down.
- 3.) Now let the **vaporizer** unit warm up for two minutes. When unit is ready, place the vapor whip filled with your **herbal material** over the heating element.

### Vaporizing with the Easy Vape Vaporizer

- 1.) Exhale all your breath and place your mouth to the mouthpiece of the vapor whip.
  - 2.) Touch the Pyrex tip to the glass slipper covering the heating element, hold it there and take a continuous steady breaths releasing the Pyrex tip from the element right before you are done in order to clear the tube.
- If you draw too slowly and the heating element is too hot, you may catch the material on fire. In this case blowout immediately and repack with fresh material.
  - Be sure to experiment with different settings and varying draw velocities.

### Smoking Technique

- The material can be packed down using the blunt end of the poker, a pen, or a pencil.
- Over-packing reduces airflow and results in overcooked or burned materials.) Expel material by blowing whip into a bottle, can, or plastic container. If some material remains in the tip it may not be thoroughly cooked.
- Moist material does not seem to work as efficiently, although it can work just fine.

### Easy Vape Digital Vaporizer Warranty

The Easy Vape Digital Vaporizer was made with replaceable fuses so that surges or electric fluctuations wouldn't burn out the system only blow the fuse. This expands the life span of the unit significantly.

The Easy Vape Digital Vaporizer comes standard with a 5 year Warranty
